## **ASX ANNOUNCEMENT**

---

### **B T KUAN APPOINTED AS NON EXECUTIVE DIRECTOR**

---

Haddington Resources Limited (**ASX: HDN**) is pleased to announce the appointment of Mr B T Kuan as a Non Executive Director.

Mr Kuan has a Bachelor of Engineering (Honors) degree from the University of Malaya and was responsible for the development and management of the Pulau Laut Coal Terminal in South Kalimantan, Indonesia. The Terminal has a design throughput of 10 million tonnes per annum and loads Panamax vessels. He has considerable experience in bulk handling and terminal operations including barges up to 12,000 dwt and tugs.

Mr Kuan has worked for significant periods in Indonesia and speaks fluent Malay, Indonesian and English. He currently resides in Australia. He spent his early career in Malaysia and Singapore in tin dredging operations, managing rubber, palm oil and cocoa processing factories, and managing palm oil bulk terminals.

Haddington Managing Director, Mr Colin McCavana said, "We welcome BT Kuan to our board and we are pleased that a person with his experience and expertise is joining our team. His coal project experience, particularly in bulk handling, will be a great asset to Haddington. His input will be valuable to the Company's Tabalong project in Kalimantan, where river and ocean transportation, and port operations, will be key factors in the project's successful development".

#### **About Haddington**

Haddington is a vertically integrated resources company with a profitable mining services business and a large portfolio of highly prospective mineral prospects. It is developing mineral targets in its existing tenement portfolio while continuing to build resources and reserves and acquiring or developing new mineral production projects. Its key projects include uranium targets at Liberator – Shoobridge (Northern Territory), iron ore targets at KLM Mesa – Shoobridge (Northern Territory), garnet deposit at Balline (Western Australia), Tabalong Coal Project (Indonesia). It has other projects, including lignite and tantalum, in Australia and Madagascar. See [www.haddington.com.au](http://www.haddington.com.au) for more project information.
